

Nighttime girder installation activities

UPDATED: July 5, 2024

On June 17, a six-month full closure of Front Street between Begbie Street and E. Columbia Street was implemented to install steel girders and build the new bridge deck between the bridge foundation south of Columbia Street and the in-river foundation near the New Westminster shoreline.

As much as possible, girder installation activities over Front Street will be completed during daytime hours; however, in some instances, this work may need to occur at night.

Starting on July 8 and continuing intermittently for approximately two weeks, crews will be conducting nighttime girder installation activities. This work must be performed at night to align with railway operations.

Nearby residents may hear intermittent noise associated with the installation and bolting of the girders.

What to Expect

Timing

Starting July 8, 2024 and continuing intermittently for approximately two weeks.

Hours of Work

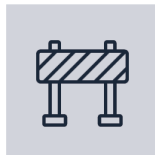

Between 8:00 p.m. and 7:00 a.m.

Construction activities resulting in periods of noise will be intermittent and continue throughout the night. Some noisy work may take place on Sundays.

Traffic

More information about the current six-month closure of Front Street is available [here](#) and on the Current Works page of the Project website.

Impacts/Interruptions

Nearby residents may hear some noise while girders are lifted and bolted into place. We appreciate your patience while we complete this work.

If you have any questions about this work, please email info@fcgp.ca or call the 24/7 phone line: 1-844-815-6149. For more information about the Project, please visit pattullobridgereplacement.ca.
