

Continuous concrete pour for in-river bridge foundation

July 15, 2024

Starting at approximately 8 p.m. on Thursday, July 18, Fraser Crossing Partners will be performing an overnight concrete pour to complete the pier cap for the in-river bridge foundation near the New Westminster shoreline. The concrete pour will continue into the following morning. This pour must be completed at night when temperatures are lower and it is important for the pour to be continuous to ensure structural integrity.

Nearby residents may hear noise from concrete trucks and heavy equipment while work is underway. Concrete trucks will access the foundation throughout the duration of the pour using the temporary access platform from the New Westminster shoreline south of Front Street. To access the work area, concrete trucks will be using Royal Avenue, Columbia Street, and Front Street.

What to Expect

Timing

Starting Thursday, July 18 and continuing until Friday, July 19.

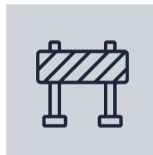

Hours of Work

Starting at approximately 8:00 p.m. and continuing into the following morning.

Traffic

Concrete trucks will access the work area via Columbia Street, Royal Avenue, and Front Street.

Impacts/Interruptions

Residents may hear noise from concrete trucks and heavy equipment while work is underway.
