

Pattullo Bridge Replacement Project

Spring 2024 Project Update

Construction of the Pattullo Bridge Replacement to solve one of the region's biggest bottlenecks is well underway. The new four-lane, toll-free bridge will provide important safety and reliability improvements for people who are driving, cycling or walking, as well as communities on either side of the bridge. The new bridge is scheduled to open in fall 2025.

This update provides an overview of ongoing and upcoming work. More detailed construction notifications can be viewed on the Construction page at pattullobridgereplacement.ca.

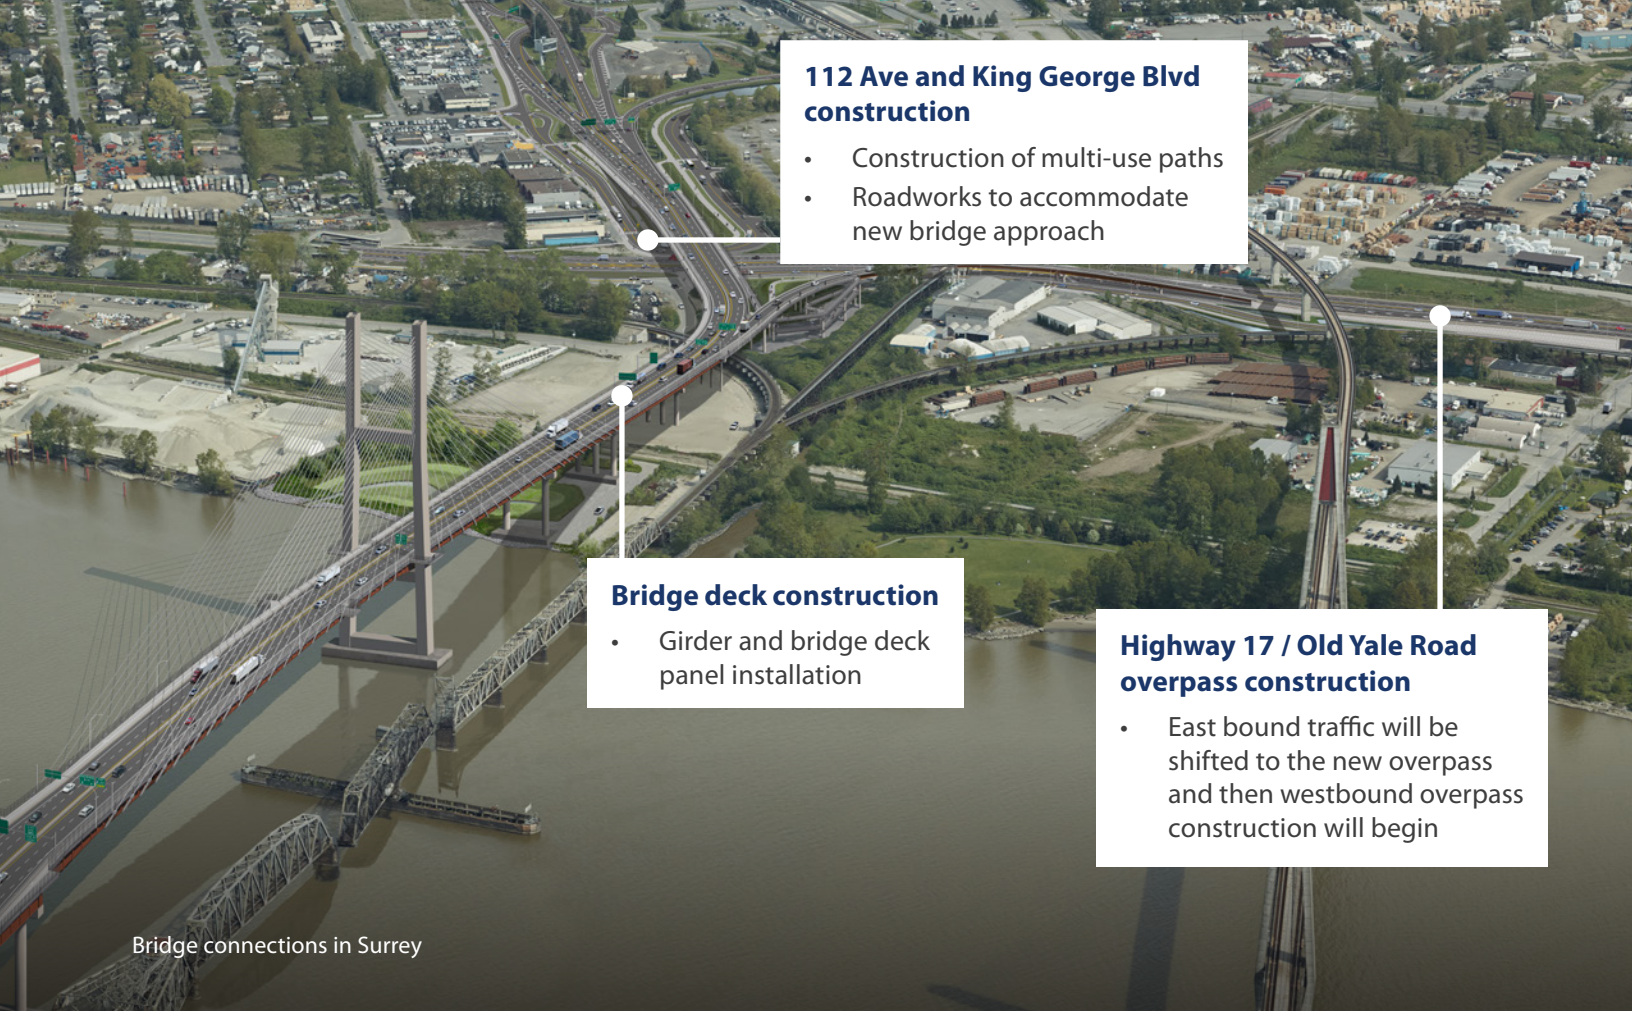

The 167-metre tall bridge tower is complete! This is now the tallest bridge tower in B.C. Bridge deck construction continues, with crews installing steel girders, concrete deck panels and stay cables outward from the bridge tower.

In Surrey, girder installation and bridge deck construction continues for the south approach. Construction continues on the Highway 17 / Old Yale Road overpass.

In New Westminster, girder installation is underway. Roadwork and utility work continue along Royal Avenue, McBride Boulevard and Columbia Street, and multi-use path construction continues along McBride Boulevard.

112 Ave and King George Blvd construction

- Construction of multi-use paths
- Roadworks to accommodate new bridge approach

Bridge deck construction

- Girder and bridge deck panel installation

Highway 17 / Old Yale Road overpass construction

- East bound traffic will be shifted to the new overpass and then westbound overpass construction will begin

Bridge connections in Surrey

Bridge connections in Surrey

The new bridge will continue to connect directly to King George Boulevard, and a new off-ramp will connect the bridge to westbound Highway 17. Highway 17 will be grade-separated over Old Yale Road, improving traffic flow. Improved walking and cycling paths will connect to the bridge and existing greenways.

Construction activities in Surrey

Construction of the bridge deck is underway. Construction continues on the new Highway 17 / Old Yale Road Overpass. Eastbound traffic will begin using the new overpass in July 2024. Other current and upcoming construction activities are noted in the graphic above.

The Fraser River and its shorelines have been actively used by First Nations since time immemorial for fishing, harvesting and other important activities. First Nations stewardship priorities are guiding the qiqéyt Foreshore Habitat Restoration in Surrey.

Bridge connections in New Westminster

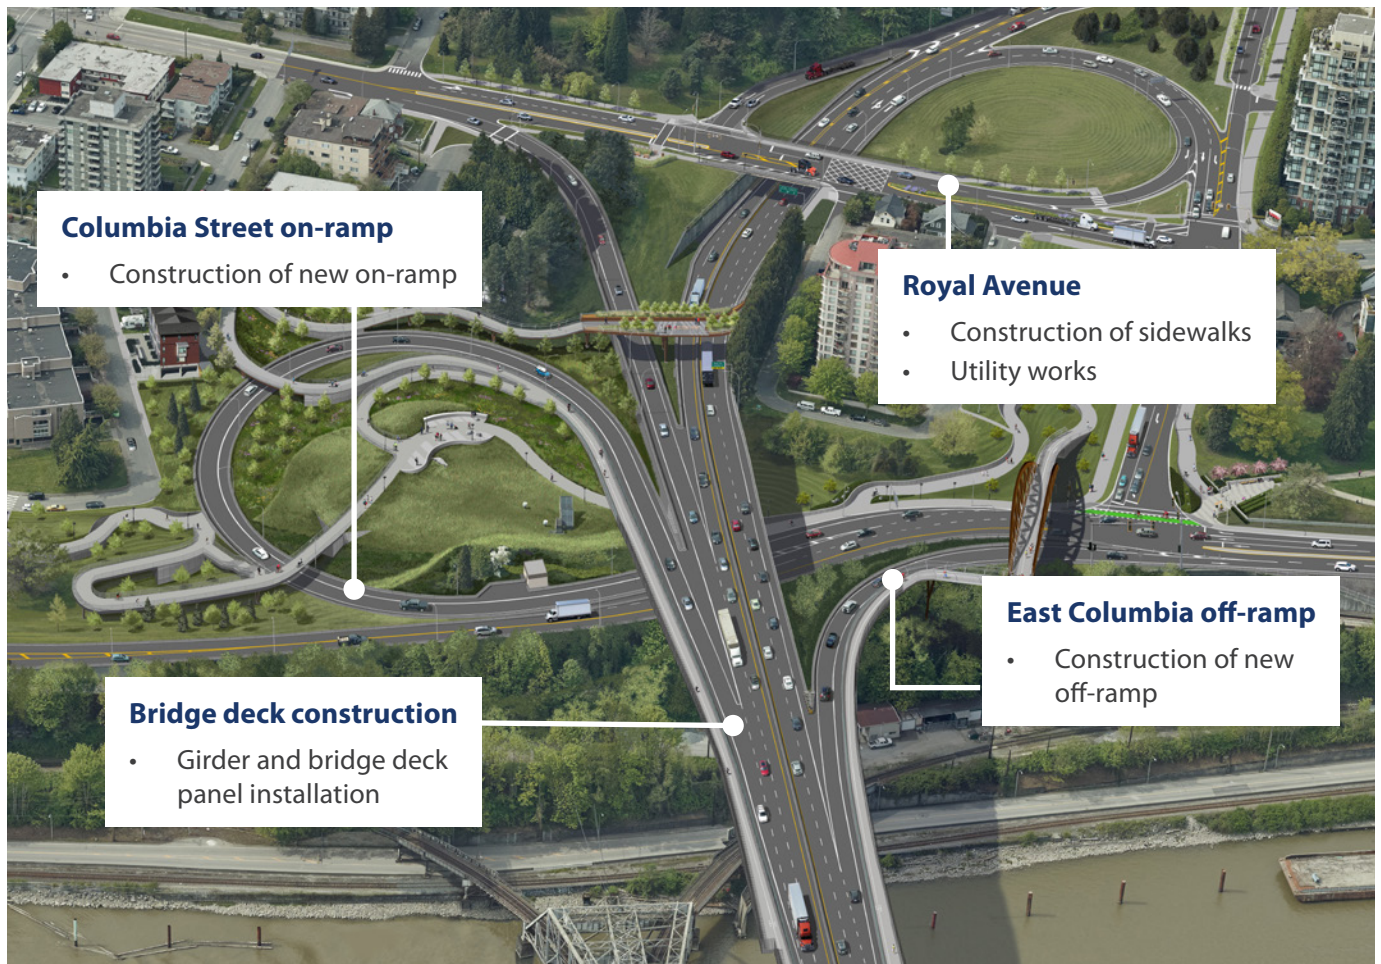

The new bridge will continue to connect directly to McBride Boulevard and a new direct off-ramp will connect the bridge to East Columbia Street. Improved walking and cycling paths will connect to the bridge and facilitate better east-west travel across the city.

Construction activities in New Westminster

Bridge deck construction is underway between Pier N1 in the river, and Pier N3 north of Columbia Street. A number of utilities have been relocated, and roadworks and multi-use path construction is underway. Other current and upcoming construction activities are noted in the graphic below.

Artist's rendering of the Agnes-Royal pedestrian overpass, a new walking and cycling path over the bridge approach connecting Victoria Hill and downtown New Westminster. Final design features, including plantings, are still being developed.

Columbia Street on-ramp

- Construction of new on-ramp

Royal Avenue

- Construction of sidewalks
- Utility works

Bridge deck construction

- Girder and bridge deck panel installation

East Columbia off-ramp

- Construction of new off-ramp

Bridge connections in New Westminster
