

# Pattullo Bridge Replacement Project

## Upcoming construction activities in Surrey

The following is an overview of upcoming construction activities and traffic pattern changes planned in Surrey for the Pattullo Bridge Replacement Project.

Crews will continue construction of the new bridge off-ramp to Highway 17 westbound and multi-use paths, the new bridge deck, and the new overpass at Old Yale Road. When lane closures and detours are required, work will be done at night where feasible to minimize impacts to drivers. Work that does not impact traffic will generally be performed between 7 a.m. and 10 p.m. Monday to Saturday.

Notifications with more information on each of these activities will be posted on the project website and distributed in advance. Those who would like to receive email notifications can sign up [here](#).

### 1. Foundation work for the new Highway 17 off-ramp and multi-use paths: ongoing into winter 2024

Pile installation is complete and construction of the new Highway 17 off-ramp and multi-use path structures continues. Some closures of Bridge Road, Old Yale Road, and nighttime closures of Highway 17 lanes will be required to complete this work. Detour routes will be in effect while these closures are in place.

## 2. Roadwork on 112 Avenue: ongoing through fall 2024

In September, 112 Avenue was graded, paved, and reopened to two-way traffic. Roadwork on 112 Avenue continues with construction of the curbs, new sidewalk, multi-use path, and embankment wall alongside King George Boulevard. Once construction on 112 Avenue is complete, there will be improved pedestrian and cyclist access to and from the new bridge and throughout the area, the addition of parallel parking on both sides of the street, and the installation of new streetlights and landscaping.

## 3. Bridge deck construction for the south approach: ongoing into spring 2025

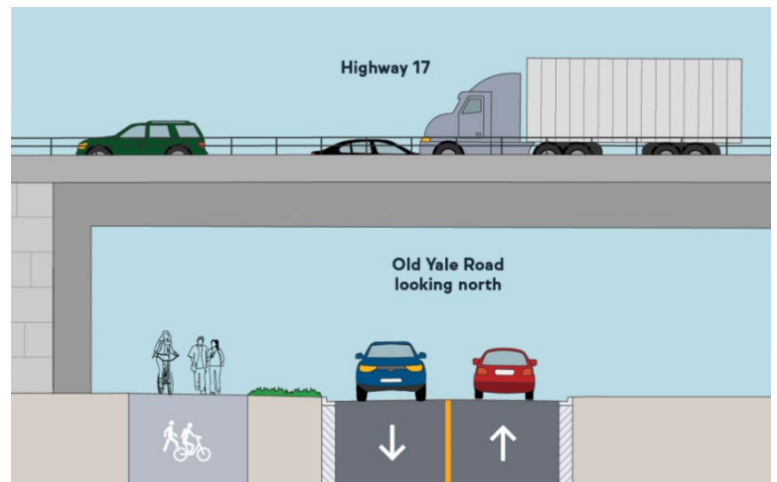

Construction of the south approach (roadway connecting to the new bridge) is ongoing. Girder installation is complete and crews are currently lifting bridge deck panels into place and pouring concrete to complete the bridge deck structure. Occasional nighttime closures of Highway 17 between Tannery Road and Bridgeview Drive will be required. Nighttime closures of 112/111A Avenue, as well as Bridge Road and Musqueam Drive, will also be required.

## 4. Construction of the Highway 17 / Old Yale Road overpass: ongoing into spring 2025

As part of the project, Highway 17 will be grade-separated over Old Yale Road, improving traffic flow on Highway 17. Access to and from Highway 17 via Old Yale Road will be removed.

**Eastbound Highway 17 traffic:** Construction of the eastbound portion of the overpass is complete. In late July 2024, eastbound Highway 17 traffic moved onto the new overpass, and drivers can access or exit Highway 17 at Tannery Road or Bridgeview Drive.

**Westbound Highway 17 traffic:** Crews are now constructing the westbound portion of the overpass. Turning restrictions and occasional closures of Highway 17 and Old Yale Road are required to complete the work. Once complete, all traffic will be moved onto the Highway 17 overpass over Old Yale Road.
